

Sn # 81 is now owned by Peter Mulhare, and operated from Whangarei Gliding Club in northern New Zealand.

Peter writes, 'KR is also fitted with a Discus Carbon fibre Seat back which is non adjustable, but makes the cockpit one of the most comfortable ones I have had the pleasure to fly in. I have "adjusted" it to suit me by the addition of a high density foam pad between the seat back and the cockpit rear wall. I also use an adjustable Discus "whoopy" cushion as a lumbar support between the parachute and the seat back. KR has currently flown approximately 1500 hours.' And sent a couple of pictures for us to enjoy.
