

Update 30/12/03

Sn# 121 is now owned by Jan Larsson and Anders Lustig, and they've sent me some nice pictures from a wave camp at Hemavan.

Jan sent me an update.. '*#121 will now be equipped with an EDS oxygen system and after that take part in the on-going wave-flying camp that my club is arranging in "Hemavan". The Hemavan camp is held every year between weeks 36-38 (some years 37-38). This year 15 gliders will take part and hopefully some respectable height-gains will result.*'

Based in Sweden from new, Sn 121 is a club aircraft for the [Laxå Flygklubb](#) Sweden.
No details I'm afraid, but some nice pictures..
